Multi-Logger Base Controller

MULTI-LOGGER

SUMS DATA LOGGING

VERSION 1/2020

SUMS

POWER WITH FLEXIBILITY

SUMS Multi-logger is the Power Choice of Facility Managers

The SUMS Multi-logger offers building and Facility Managers a powerful, flexible and low cost solution for the remote recording of any utility meter.

Up to 128 separate meters can be either directly cabled to the Multi-logger system simultaneously. The Base receiver module can be configured with 4 x XB32 Expansion Boards and communicates with the SUMS™ portal via its integrated 3G wireless module, uploading usage data in 15-minute time-stamped intervals. AMR data can also be automatically forwarded to a Utility Retailer or 3rd party provider for the purposes of billing or analysis.

FEATURES
